SUBJECT INDEX

AIRGLOW, NIGHT
continuum, radiative association mechanisms, 243
hydroxyl, excitation, emission and thermal reviews, 235
NO, δ and γ bands, satellite observations, 481
oxygen bands, atmospheric, altitude profile, 783
oxygen bands, Herzberg systems, satellite observations, 481
oxygen bands, infrared atmospheric, altitude profile, O_3 abundance, 1391
oxygen bands, UV, altitude and vibrational distributions, 913
oxygen concentration, airglow inversion, 775, 929, 1269
oxygen emission profiles, rocket data, 1269
oxygen excitation mechanisms, from association of atomic oxygen, 211, 1269
oxygen green line, altitude profile, 783
oxygen green line, $O(^1S)$ quantum yield, F-region, 607, 893
oxygen red line, $O(^1D)$ from $N(^2D)+O_2$, 699
oxygen red line, $O(^1D)$ quantum yield, F-region, 607, 893
sodium, chemistry review, sudden sodium layers, 247

ASTROPHYSICS
chemistry of interstellar CH^+, 1683
neutral atom flux, heliosphere-interstellar interaction, 439

ATMOSPHERE, PLANETARY
radiative association, continuum airglow, 243

ATMOSPHERE, TERRESTRIAL
composition,
neutral cloud evolution, model, 1139
scale heights, satellite orbit analysis, 223
thermosphere, polar, chemistry, review, 271
density, satellite orbit analysis, 223
energy budget model, compared to radiation budget experiment, 1237 1585
models, solar-terrestrial, applications software, 541
stratosphere,
ion chemistry review, 255
ozone changes in the polar regions, 373, 403
thermodynamics, cooling by greenhouse gases, 1011, 1535
thermosphere, polar, composition, chemistry and dynamics, 271
thermosphere temperature observations at low latitude 23°, 1545

ATOMIC PROCESSES
see REACTION DYNAMICS

AURORAE
beam-plasmas, ion-acoustic double layers, 1055
correlations with geomagnetic pulsations, 1303
dayside, related geophysical phenomena, 621
dynamics, cusp region, 879
energy deposition rate, 299
pulsating, electron fluxes, 1043
radio, VHF Doppler radar operation during geomagnetic activity, 1371

BATES, DAVID ROBERT
an appreciation, 1583

BEAMS, INJECTED
see SEEDING

BOOK REVIEWS
Bates DR: Extreme Ultraviolet Astronomy, Ed. RF Malina and S Bowyer, Pub. Pergamon Press, 149
Bates DR: High Energy Astrophysics; American and Soviet Perspectives, Ed. WHG Lewin *et al*, Pub. National Academy Press, 1027
Bates DR: Recent Results and Prospective Instrumental Developments in X- and Gamma-Ray Astronomy, Ed. L Bassani *et al*, Pub. Pergamon Press, 591
Bell KL: Astronomie, An Introduction, by Agnes Acker, Pub. Masson, 1483
Dungey JW: Magnetospheric Physics, Achievements and Prospects, Ed. B Hultqvist and CG Falthammar, Pub. Plenum, 592
Hapgood M: Planetary Magnetospheric Physics, Ed. RJL Grard *et al*, Pub. Pergamon Press, 1299
Harrison RA: Solar Coronna and Solar Wind, Ed. E Antonucci and BV Somov, Pub. Pergamon Press, 592
Moore P: Asteroid and Spacecraft Dynamics, Ed. WH Ip *et al*, Pub. Pargamon Press, 749
Phillips KJH: Opening Frontiers in Solar Research, Ed. R Falciani *et al*, Pub. Pergamon Press, 749
Solomon S: Earthwatch, the Climate from Space, by JE Harries, Pub. Ellis Horwood, 591
Williams DA: Solid State Astrophysics, Ed. E Bussoletti and G Strazzulla, Pub. Elsevier, 889

CHEMICAL RELEASES
see SEEDING

CHORUS
see RADIO WAVES

COMETS
simulation, temperature evolution and vapour pressure build-up in porous ices, 1311

COORDINATE TRANSFORMATIONS
a user guide, 711

CORPUSCULAR RADIATION
see PRECIPITATION or RADIATION BELTS

COSMIC RAYS
Forbush decrease, shock effects, 1109
modulation , near onset and maximum phases of solar cycle, 1227
muons, sidereal variation and solar activity, 1167
variations around magnetic cloud passage, 979
variations, 11-year and 22-year, 811

CURRENT SYSTEMS
ring, interaction with plasmasphere, 859

GEOMAGNETIC FIELD
activity correlated with magnetic cloud passage, 979
field lines, open, size change during substorm, 1513
penetration of solar wind plasmoids, 193
storm,
D_{st}, phenomenological study, 731
electron fluxes with whistler associations, 1409
energy output rate, magnetospheric dynamics, 581
predictions by neural networks, 457
winds and electric fields, 595
substorm, related electric field disturbances in ionosphere, 95

GRAVITATIONAL FIELD
pertubations of satellite orbits, eccentricity variations, 847

GREENHOUSE EFFECT
atmospheric cooling from enhanced gas concentrations, 1011, 1535

HELIUM
atmospheric escape, charge exchange mechanism, 1639

HYDROXYL
see AIRGLOW

INCOHERENT SCATTER
see RADAR

INSTRUMENTATION
magnetometers, limitations of spectral analysis, 707
neural networks predict solar-terrestrial effects, 457

INTERFEROMETRY
Doppler imager, high resolution, mesospheric winds, 1599

INTERPLANETARY SPACE
hydrogen atom flux, UV background and detection possibilities, 1525
magnetic cloud transit, ionospheric response, 519
medium, heliosphere, neutral atom flux anisotropy, 439
probe, rf pressure on plasma due to probe field, 1063

IONOSPHERE
disturbances,
occurrence of large-scale, universal time effects, 1093
Perkins instability, 1615
TID, aspects reviewed, 829
TID and MED waves, radiotelescope data, 447
dynamics,
ion drifts, evolution and signatures, 663
low auroral fringe during disturbance, 1101
plasma motions and *em*-emissive power, 509
response to transit of interplanetary magnetic cloud, 519
E-region, incoherent scatter observations, 355
electric field,
disturbances, substorm related, 95, 595
equatorial, 941
power spectra, post-sunset F-region, 655
electron heating in the F-layer, 901
F-region,
electron densities, $O(^1S)$ and $O(^1D)$ quantum yields, 607
electron heating, 901
incoherent scatter observations, 355
ion chemistry in stratosphere, 255
O^+ losses and effects, 1631
pertubations by Pi2 pulsations, 1461
storm associated winds and electric fields, 595
ions,
H^+ and He^+ field-aligned flows, 751
O^+, increased loss from F-region, efects, 1631
subauroral, drift evolution and signatures, 663
topside, field-aligned flows of H^+ and He^+, 751

JUPITER
Io, particle acceleration by Alfvén waves, 1499

MAGNETOHYDRODYNAMICS
field lines, reconnection, steady-atate and time-varying, 63
couplings,
magnetosphere to ionosphere, kinetics in plasma sheet, 1071
magnetosphere to solar wind, reconnection, 879
magnetosphere to solar wind, two-fluid model, 131
dynamics, storm,energy output rate, 581
eigenvalues, VLF, in Earth-ionosphere waveguide, 1363
flux transfer event, the statistical cusp, 1251
instability, low frequency, neutral induced, 1197

instability, non-resonant, quasilinear theory, 1479
pulsations,
correlation with dayside auroral forms, 1303
Pc1, irregular, diminishing period, polarization, 1081
Pc1, plasmapause waveguide in Alfven mode, 139
Pc1, polarization, statistical characteristics, 1353
Pc3, activity correlations with solar wind, 1399
Pc3-4 and Pi2, characterisation in ionosphere, 495
Pc5, equatorward phase propagation, 797
Pgs, magnetometer and radar data, 953
Pi2, height dependence of F-region pertubations, 1461
ULF, amplitude modulation in signatures, 965
ULF, foreshock boundary, 1203
ULF, spatial variation, 1215
waves,
Alfvén modes of waveguide at plasmapause, 139
Alfvén, saturation in ring current region, 477
Alfvén, vortex turbulence spectrum, 1235
ion-acoustic double layers and solitons, 1055
ion-acoustic, nonlinear, in dusty plasmas, 1, 973
electrostatic, double layers in dusty plasmas, 465
R wave cut-off, relativistic theory, 433
hybrid, non-uniform plasmas, 473,477

MAGNETOSPHERE
boundary layer exploration, 1431
current sheet, heliospheric, without neutral line, 105
electron distributions, models, 671
magnetopause reconnection, 879
magnetotail, steady-state plasma sheet, 27
plasma sheet,
flux transfer events, 1551
kinetics of magnetosphere to ionosphere coupling, 1071
steady-state, in distant magnetotail, 27
plasmasphere, ring current interaction, 859
statistical cusp, flux transfer event, 1251

MARS
accretion of ions from solar wind, 121,131
magnetic field and dipole, spacecraft observations, 707, 719
Phobos, interaction with solar wind, 1033

METEORITICS
meteor trains, scattering of radio waves, 1487

NITROGEN
atomic, chemistry, density, thermospheric, 337

NITROGEN OXIDES
NO, thermospheric, photochemical model, 315

OXYGEN
atmospheric abundance, airglow inversion, 775
atmospheric abundance, SKYLAB occultation data, 1153

OZONE
Antarctic, spring behaviour, 7
infrared (NLTE) spectrum, 1289
mesospheric, NLTE processes, 989
mesospheric, abundance from $O_2(^1\Delta_g)$ emission at night and twilight, 1391
stratospheric, heavy, the symmetric isomer, 1573
stratospheric, long-term polar losses, 373, 403
tropospheric, Arctic winter variations, 203

PLASMA
dusty,
double layers, large amplitude, 465
ion-acoustic waves, 1, 973
velocity modulation, 763
vortices, 647
ionospheric, Langmuir turbulence, beam-plasma discharge, 535
ionospheric, moving, *em*-emissive power, 509
multispecies dusty, nonlinear waves, 1
R wave cut-off propagation theory, 433

PRECIPITATION
auroral energy deposition rate, 299
electrons,
fluxes over pulsating aurora, 1043
ionosphere-plasmasphere coupling fluxes, 1409
relativistic, stratospheric evidence, 413

RADAR
incoherent scatter, E and F-regions, 355
VHF Doppler radar observations during geomagnetic activity, 1371

RADIATION BELTS
inner, electrons, multiple peaks in quiet-time spectra, 89

RADIO WAVES
chorus emissions, review, 681
hiss, mid-latitude plasmaspheric, 1325
VLF,
eigenvalues for atmospheric waveguide propagation, 1363
intensity peaks, low latitude, satellite observations, 1425
whistlers,
dispersion, 873, 1185
ionosphere-plasmasphere coupling electron fluxes, 1409
L-dependence, 1193
propagation, 985, 1339

REACTION DYNAMICS
absorption cross-section,
O_2 Herzberg continuum, 185
O_2 Schumann-Runge bands, 185
atom transport, proton-hydrogen in N_2, 1503
charge-transfer, O^+ to H_2O, dynamics, 1695
collisional excitation, $O(^1D)$ from $O_2(B^3\Sigma)$,1719
cross section, electron impact, for methane, 1535
excitation, $O(^1D)$, from $N(^2D)+O_2$, 699
photoionization cross sections for atomic oxygen, 1419
radiative recombination of atomic oxygen, 1705
reactive collision terms for fluid transport theory, 47

RING CURRENTS
see CURRENT SYSTEMS

SCINTILLATIONS
see RADIO WAVES

SEEDING
beam injections,
beam dynamics, 153
Langmuir turbulence and plasma discharge, 535
plasma interactions, 153, 1581
spacecraft charging, recent results, 153

SODIUM
atmospheric, equilibrium, 1607

SPACECRAFT
glow, locally induced, N_2 LBH bands, 481
orbit analysis, gravitational pertubations, 847
probe electric field, pressure on plasma, 1063
re-entry dynamics, debris trajectory analysis, 641

SUN
heliosphere, current sheet without neutral line, 105
magnetic fields, quasi-periodic variations, 741
solar-terrestrial models, applications software, 541
solar wind,
interaction with planets, 121, 131, 1033
large-scale properties, variations in, 741
plasmoids into geomagnetic field, 193
pulsations, Pc3, correlations, 1399

VENUS
accretion of ions from solar wind, 121,131
chemistry of nightside ionosphere, 1663
ionospheric holes, enhanced dynamic flow, mass spectrometer data, 33

WHISTLERS
see RADIO WAVES

WINDS
mesospheric, high resolution Doppler imager, 1599
storm related, latitude, longitude variations, 595
thermospheric, neutral, at 23°S, 767
zonal, satellite orbit analysis, 223
